

Notable Quotable

“We’re fascinated by robots because they are reflections of ourselves.”

~ Ken Goldberg, professor of robotics, engineer, and artist

July Horoscopes and Birthdays

In astrology, those born between July 1–21 are Crabs of Cancer. Crabs are deeply emotional and nurturing. They create deep bonds and comfortable homes and are always willing to welcome people into their circle. Those born between July 22–31 are Lions of Leo. Leos are natural-born leaders: confident, charismatic, and creative. Leos use their humor and loyalty to bring people together to work for a common cause.

Lon Brewer - July 5th
 Louise Clark- July 6th
 William Stodola – July 7th
 Mary King – July 28th

The Robotic Future Is Here *continued from pg. 1*

sense their environment and use electronic maps and traffic data. They know when to stop and go, what route is the fastest, and what speed is the most energy efficient. The Roomba vacuum also uses sensors to know when to stop and go, which parts of the floor are dirtiest, and when cleanliness has been achieved. Additionally, the Roomba can identify whether it’s vacuuming a hardwood floor or plush carpet and adjust accordingly.

Do these robots spell the end of work for cabbies and janitors? Some say that half the world’s jobs will be done by robots by the middle of the century. One such robot is “Flippy,” the mechanical burger flipper, which debuted at a California burger joint last March. Another is Kiva, a robot designed to retrieve goods from the vast warehouses of the online seller Amazon. Whatever your feelings for robots, in many ways they are already working among us.

Starting This Month, we will be going to Walmart 3 times a month and going to Hy-Vee, Target, Dollar Tree, The 4th Thursday of the month. I’ll have a sign-up sheet out-side the activity room for you guys to vote on the one you would like to go to each month!!!

The Robotic Future Is Here

Robotics and artificial intelligence (AI) are now two of the most exciting fields in science. Some say that the marriage of AI and robotics will usher in an entirely new way of life for us on Earth. Others worry that this change is going to be too dramatic. The great debate over the future of robotics will continue at the World Conference on Robotics and Artificial Intelligence in Barcelona, Spain, on July 26–27.

intelligence refers to a machine or robot that can learn from its surroundings and adapt to them.

Machines are starting to learn in similar ways to human beings. They are able to receive signals from their environment, store those signals as vital information, and modify their behaviors. Both self-driving cars and robot vacuums use this technology. Cars simultaneously

continued on pg. 4

While some robots look like mechanical people with two arms, two legs, and a talking head, most robots look nothing like humans. Robots are usually controlled by computers, such as those found in a manufacturing facility. Artificial

To Kiss or Not to Kiss

Is there any act more romantic than a kiss? World Kiss Day may fall on July 6, but not everyone around the world believes that a kiss is an expression of love or friendship.

and most acceptable in the Middle East. However, in Central America, kissing has no place in romance and is considered culturally unacceptable. Similarly, kissing is not common in sub-Saharan Africa, and in some parts of Brazil kissing is considered just plain gross. It seems that kissing is not a universally accepted human practice, so be careful where and how you celebrate World Kiss Day.

Americans reserve kisses for special loved ones, but in Europe it is common for friends to greet each other with kisses on the cheek. Researchers have also found kissing to be common in Asia

Doreen Christensen-
Employee of the month

Thank you Doreen for all
your hard work!! We
Appreciate you!!!

From the Desk of Manager, Nick Lensch

Happy Independence Day Edencrest Family,

Thank you to our veterans who made it possible for us to enjoy our freedom. I am thankful to live in this great country and work with the greatest generation who live here at Green Meadows.

Summer is here and so is the heat! Please be sure to use sunscreen if outdoors for an extended period. Also, be sure to drink plenty of water to stay hydrated. It is very important to stay cool on these excessively hot days in July. So, stay in the shade and grab some water on your way out the door.

Have a great July and enjoy the wonderful warm weather,

Nick Lensch, Manager

Please welcome our new driver Richard

He will be driving Monday Wednesday and Fridays!

We would like to try to have you guys make your appointments the best you can on these days during the week (Monday, Wednesday, Friday) we understand that not all appointments will be able to be on those days and will still get you to those appointments no matter the day during the week!!!

Thank you!!!

In the kitchen with Chef Amy

We will be holding a food tasting Friday July 20th at 3:00 with happy hour!!!

Come and try something new on the Menu
